NEPA Task Force Web Site Reports a New Feedback Entry:

Name: Laura Solomon

Email Address: Laureli4487@Earthlink.net

Comments: I truly believe that the evaluation of the NEPA law is an attempt to re-define what is fat and what is beef, and then cut the fat. Any law that hinders the further despoiling of the natural gifts God gave this great country is good. No, great. Living systems adapt to change, as the economic system this administration wants to support does so poorly. This tells you something about the economy that the economic indicators miss. It is not sustainable.

The sooner the economic dinosaur drops dead, the sooner viable systems will have a chance to emerge.
